ECONOMICS (ECNC)

ECNC 200 Principles of Microeconomics
This course covers the theory and application of microeconomics. Topics include competition and monopoly, pricing, consumer demand, and producer supply. Labor markets, global economies, and regulations/antitrust policies are described. 3 credits.

ECNC 201 Principles of Macroeconomics
The study of economics necessitates an understanding of the principles that govern the operation of the economic system. This course focuses attention on the aggregate (macro) relationships and gives attention to the central problems of economic organization, the functioning of the price system, the economic role of government, the determination of national income and a brief glance at economic policy. 3 credits.

ECNC 202 Fundamentals of Microeconomics, Level A
Microeconomics focuses on the choices made by individual decision-making units in the economy—typically consumers and firms—and the impacts those choices have on individual markets. In this competency, you will learn the three fundamental questions of microeconomics, understand how to analyze supply and demand, and define consumer behavior. 1.5 credits.

ECNC 205 Fundamentals of Microeconomics, Level B
The fundamentals of microeconomics helps firms use production functions and calculations to determine the optimal level of production, costs, and profit. It also provides a deeper understanding of how firms interact in varying markets (competitive, monopolistic, and oligopolistic). 1.5 credits.
